CORPORATE FINANCE FOR GROWTH & MATURE COMPANIES

IBS Investment Bank offers institutional investors a distinctive array of qualified investment opportunities through its origination arm Institutional Banking Services, N.A. CORP.

The Letter of Credit Dilemma

One of the least understood yet most powerful small business financing tools is the Letter of Credit (LC). While it is used fairly extensively by larger companies, many small business owners have not had the opportunity to leverage this valuable vehicle for their enterprise. The LC is often the “missing link” that a business needs to unlock the capital that it needs to succeed. Due to the regulatory nature of depository banks, LC approval decisions are primarily based upon the review of corporate tax returns, personal and business credit as well as other factors. In addition, depository banks typically require a 1:1 ratio of cash-on-hand versus the amount of the LC. Unfortunately, many businesses are being denied the credit that they need to grow based upon historical data and their present cash position. Banks often turn to IBS to fulfill their client’s Letter of Credit needs and enhance their relationships.

IBS, N.A. Fill the Trade Financing Gap By Originating SBLC’s up to \$10MM
